INTERNATIONAL TRAUMA CONGRESS

20 - 22 February 2017
Grand Hyatt Hotel
Dubai, United Arab Emirates

www.itcdubai.net
H.H Sheikh Mohammed Bin Rashid Al Maktoum
Vice President of the United Arab Emirates
Prime Minister, Ruler of Dubai
H.H Sheikh Hamdan Bin Rashid Al Maktoum
Deputy Ruler of Dubai, Minister of Finance
H.H Sheikh Hamdan Bin Mohammed Al Maktoum
Crown Prince of Dubai
Dear Colleagues,
It is my great pleasure to invite you to join the International Trauma Congress held for the first time in Dubai between 20 – 22 February 2017 at Grand Hyatt Dubai Hotel.

As Rashid Hospital is the largest hospital in the United Arab Emirates, and its Trauma Department the largest Trauma Centre in the region, we have organized the 1st International Trauma Congress to be the start of a regular Trauma congress to discuss the latest and most advanced techniques in Trauma Surgery, and have the chance to share experiences with the best trauma surgeons in the world aiming to develop trauma surgery in Dubai according to the most modern evidence base medicine practice. Covering the most up-to-date scientific and technical aspects, our exciting programme of presentations, instructional lectures, case discussions and interactive sessions brings together an international congregation from the Middle East and beyond.

This congress promises to provide a truly global perspective to support a culture of excellence and best practice care in trauma management. For surgeons and researchers, this is an ideal opportunity to interact with your peers and our faculty of distinguished regional and international speakers, share experience and expertise, and showcase outstanding projects and interesting cases.

Mark the date in your calendar today and join us in Vibrant Dubai in February 2017

Dr Bilal El Yafawi
Congress Chairman
Head of Orthopaedic and Trauma Department
Rashid Hospital, Dubai, UAE
Organizing Committee

Fawzy Hamdy Elmobayed UAE
Hayder Saleh-Al-Saadi UAE
Khaled Al Awadi UAE
Malallah Hassan Ali UAE

International Speakers

ALI EZZATI – GERMANY

University: Semmelweis University Budapest (completion September 1993 – Diploma in General Medicine)

Doctor thesis: „Operative Behandlungen der pertrochanteren und subtrochanteren Frakturen bei alten Patienten mit DHS und Gamma-Nagelung“

PROFESSIONAL QUALIFICATIONS

May 2000 Spine surgeon in Bad Berka
2003 Consultant spine surgery in Bad Berka
2006 – 09/2012 Leading consultant spine surgery in Bad Berka
Since 01.10.2012 Head of department for spine surgery HELIOS-Klinikum Erfurt

EMPLOYMENT HISTORY

Work History Orthopaedic

Academic Positions Consultant spine surgeon

Research and Training Spine surgery since 2000, '06 to 09/12 Leading consultant in spine surgery Bad Berka

Chlodwig Kirchhoff – Germany

1998-2000 Human Medicine Ludwig-Maximilians-University Munich
2000-2003 Human Medicine Technische Universität Munich
2003-2004 Internship at Hospitals of the Ludwig-Maximilians-University Munich
24.06.2014 Approval medical specialist in special trauma surgery
06/2014 Registrar, Department of Traumatology, Klinikum rechts der Isar, Technische Universität Munich, (Head of department: Prof. Dr. med. P. Biberthaler)
06/2015 Section Chief - Shoulder and Elbow Surgery, Department of Traumatology, Klinikum rechts der Isar, Technische Universität Munich, (Head of department: Prof. Dr. med. P. Biberthaler)
12/2015 Executive Registrar, Department of Traumatology, Klinikum rechts der Isar, Technische Universität Munich, Head of department: Prof. Dr.

Membership

The association for the rationale treatment of fractures, ARTOF
Deutsche Gesellschaft für Orthopädie und orthopädische Chirurgie, DGOOC
Deutsche Gesellschaft für Unfallchirurgie, DGU
Deutsche Vereinigung für Schulter- und Ellenbogenchirurgie, DVSE
Sektion Chirurgische Forschung der Deutschen Gesellschaft für Chirurgie
Vereinigung der Bayerischen Chirurgen
Deviary Kader – UK

Professor Kader is an accomplished knee surgeon, researcher, academic, educationalist, humanitarian and a specialist surgeon for the International Committee of the Red Cross. He is a fellowship trained knee and sport medicine surgeon with an extensive experience in knee ligament reconstruction, primary/revision knee arthroplasty, multiligament reconstruction and patellofemoral joint instability. After completing orthopaedic training in Scotland and knee fellowship in Sydney/Australia and Newcastle in 2005, he was invited to accept a consultant trauma and orthopaedic surgeon post at the QEII NHS Trust in Gateshead and to become a team doctor for Newcastle United football club. This gave him an opportunity to care for professional athletes and obtain the membership of the faculty of sport and exercise medicine in the UK.

In August 2015 he was appointed as a consultant orthopaedic surgeon with special interest in knee surgery at the Academic Surgical Firm, South West London Elective Orthopaedic Centre (SWLEOC) where he works very closely with professor Richard Field and his team. He is also a visiting professor in the Faculty of Health and Life Sciences in Northumbria University and a director of OASIR Research group (www.oasir.co.uk). In the past 10 years he has developed an extensive interest in research and postgraduate training and published more than 88 scientific papers, book chapters and articles. He is editor in chief of two journals and associate editor of many prestigious national and international journals. He is also a co-author of two of the best selling Postgraduate Orthopaedic books in the UK and a co-director of the six days postgraduate FRCS Orthopaedic lecture and clinical course. Since 2010 he has been dedicating a significant amount of his time for humanitarian work with NGMV medical charity (www.ngmvcharity.co.uk) and the International Committee of the Red Cross (ICRC) (www.icrc.org/en/where-we-work/middle-east/lebanon).

F Cumhur Öner – Netherlands

Cumhur Öner is professor of spinal surgery at the UMC (University Medical Center) Utrecht, the Netherlands. He is also the head of combined neurosurgical-orthopedic spine fellowship and the director of the AOSpine reference center. Born in Turkey, he completed his medical studies at the Hacettepe Medical School in Ankara. He completed his orthopedic residency at the Erasmus Medical Center in Rotterdam and joined the orthopedic staff of the UMC Utrecht in 1994. He received his PhD, cum laude, in 1999 on his thesis ‘Thoracolumbar Spine Fractures: Diagnostic and Prognostic Parameters’. He has been a member of the STSG (Spine Trauma Study Group) Executive Board and is the chairman of the AOSpine Classification Group. He was the chairman of the Dutch Spine Society between 2007-2010. Currently he is the chairman of the Knowledge Forum Trauma of the AOSpine. Prof. Dr. Öner has published over 150 scientific articles and authored over 25 book chapters.
Gilbert Taglang – France

1987 Success of the Speciality in Orthopaedic Surgery at the Catholic University in Louvain-en-Woluwe (Brussels)
1988 Recognition of Orthopaedic Surgery Speciality by the French National Medical Association (within the European equivalences)

MEDICAL PROGRAMME
1987, 1988 Assistant at the SHU (Emergency Department) and Policlinics (CTO-Illkirch).
1989 – July 06 Head of the Emergency Department at the CTO-Illkirch.
Aug.06 - today Chief at the Trauma Department of the University Hospital Strasbourg Hautepierre

MEMBERSHIP
- Founding member of the AIOD (Association Internationale pour l’Ostéosynthèse Dynamique)
- Treasurer from 1986 to 2000, - President from 2000 until today
- Member of the ISFR (International Society for Fracture Repair)
- Treasurer of the AIOD Francophone
- Member of the AIOD Germany
- Senior lecturer at the University of Strasbourg (School of Medicine and Superior Institute for Nursing)
- Member of the OTC Spain

James Waddell – Canada

Dr. James Waddell graduated from the University of Alberta Medical School. He did his postgraduate training in orthopaedic surgery at the University of Toronto and assumed a staff position at St. Michael's Hospital, a fully affiliated hospital with the University of Toronto.

He has occupied a number of positions at St. Michael's Hospital including the Surgeon-in-Chief position for 10 years and the Medical Director of the Trauma Program for an additional 5 years. He was an examiner for the Royal College of Physicians and Surgeons of Canada for 11 years, the last six as the Chief Examiner in Orthopaedics. He was also an examiner for many years for the American Board of Orthopaedic Surgeons and continues to examine for the SICOT diploma.

At the University of Toronto I was appointed as the Professor & Chairman of the Division of Orthopaedic Surgery completing a 10 year term in June of 2006.

He has also occupied a number of positions in the Canadian Orthopaedic Association culminating in the Presidency. He also acted as the Coordinator for the Canadian National Action Network for the Bone and Joint Decade for the 10 years of the decade; he has recently completed a four year term as the Board Chair of the Canadian Orthopaedic Foundation.

With regard to academic activity he published 151 peer reviewed papers and presented hundreds of lectures at national and international meetings. He is the Editor of seven textbooks. He is the former Editor of the Canadian Journal of Surgery and currently functions as a Deputy-Editor for the Journal of Bone & Joint Surgery and an Associate-Editor for the Bone & Joint Journal.

He continues to be in active practice primarily focusing on joint replacement surgery as well as traumatology and is currently the Chair of the Expert Panel for Orthopaedic Surgery for the Province of Ontario and the Co-Chair of the National Hip and Knee Knowledge Translation Network

Jan von Recum – Germany

Assistant Medical Director, Head of the Department for Knee, Foot and Ankle Surgery
Senior Consultant Orthopaedic and Trauma Surgery, Head of in-house study group for Computer Assisted Surgery, Consultant Al Razi Hospital Kuwait, Department for Foot and Ankle Surgery
Trauma, Orthopaedic, Foot & Ankle and Knee.

Resident General Surgery Brüderkrankenhaus St. Petrus
Department of General Surgery, Bonn, Germany
Resident General and Trauma Surgery Rechbergklinik
Department of Surgery, Bretten, Germany
Senior Consultant Trauma and Orthopaedic Surgery
BG-Trauma Center Ludwigshafen, University of Heidelberg
Department of Traumatology and Orthopaedic Surgery, Ludwigshafen, Germany
Kai Olms – Germany

Dr. Kai Olms started his medical education in the field of trauma surgery and hand surgery in Bremen, Germany.

Looking for other aspects in trauma surgery, he decided to use the weekends to fly a rescue doctor on a rescue helicopter for about 10 years.

He finished his career in surgery in Lübeck, Germany.

In 1991 he joined a partner in a surgical practice and started to specialize in foot and ankle surgery with educational visits in the USA.

Since 25 years he worked as trauma and general surgeon, however, the main field of interest was foot and ankle surgery.

He was the founding president of the “Society for foot and ankle surgery” in Germany (Gffc) in 1996 with about 1800 members in 2016.

Since 25 years he was chairing numerous foot and ankle congresses, wet labs and other educational events globally.

With an American group of surgeons "Healing the children", he was involved in charity programs in the third world.

Kenneth Faber – Canada

Born in Strathroy, Ontario, Canada, Dr. Ken Faber received his MD degree at the University of Toronto and residency training at the University of Western Ontario. After qualifying as an orthopaedic surgeon in 1995 he completed a clinical fellowship in hand and wrist surgery at the Roth|McFarlane Hand and Upper Limb Centre and then a Shoulder and Sport Medicine fellowship at the Steadman-Hawkins Clinic in Vail, Colorado. A Masters degree in Health Professions Education was completed at the University of Illinois at Chicago in 2004. He is currently an Associate Professor in the Department of Surgery at the University of Western Ontario and focuses on upper limb trauma, shoulder reconstruction and elbow reconstruction surgery.

Khai Lam – UK

Mr Lam is a senior Consultant Spinal Surgeon with over 20 years experience in the treatment of complex spinal disorders. He helped establish the internationally renowned Spinal Unit at Guy’s and St Thomas' Hospital London, which is part of Kings College London Medical School. He is now working full time at the London Bridge Hospital, which been accredited as a world class AOSpine Unit (since June 2016).

He has published extensively and is regarded as a pioneer in innovative spinal surgery procedures, especially minimal invasive spine surgery, and has been involved in a number key product development for Depuy-Synthes, part of Johnson and Johnson. His research work is covered in excess of 100 published scientific papers and presentations in the UK, and internationally. He has lectured extensively in the UK and around the world, and belongs to the AO National and International teaching faculty. Also he sits on the editorial Board of Spine and European Spine Journals.

He was the first British recipient of the Gold Medal of Honour presented by Mme Chirac of France, on behalf of the Etoile Européenne du Dévouement Civil et Militaire(EEDCM). He was honoured for his work using minimal invasive techniques in the treatment of children with spinal deformities, and treating Royal Air Force, US Air Force and NATO ejectee pilots. On 29th Jun 2016, he was honoured as a Knight Grand Cross of the Royal Order of the Lion by His Majesty King Kigeli V, of Rwanda, for his work training surgeons from Africa.

Mr Lam continues in both clinical and laboratory research into spinal disorders. He is a key opinion leader in the field of spinal disc replacements, paediatric spinal deformities, and minimal invasive spinal surgery and XLIF surgery. He has been the surgical training supervisor to over 100 Advanced Training Fellowships for Spinal Surgeons from Africa, Asia, and the Middle East via IGASS and AOSpine.

Martin Hessmann – Germany

1996: Qualification in Trauma Surgery
1997-2008: Senior Registrar at the department of Trauma Surgery at the Johannes Gutenberg-University, Mainz (Germany)
2000: European Board of Surgery Qualification in Traumatology (EBSQ)
2003: PhD-thesis on the biomechanical properties of fixed-angle implant systems in fractures of the proximal humerus

Since 01.08.2008: Director of the Department of Orthopaedic and Trauma Surgery, Academic Teaching Hospital Fulda, Germany (Level 1 Trauma Center)
Since 2010: Professorship at the Johannes-Gutenberg-University, Mainz, Germany
Since 2005: Member of the Intramedullary Nailing Expert Group (INEG) of the AO/ASIF-foundation

Special topics of interest:
- Surgery of the pelvis, acetabulum & hip joint, Polytrauma management, Joint replacement, intramedullary nailing, Reconstructive surgery of the musculoskeletal system.
- Editor of Operative Orthopedics and Traumatology (Journal)
- Intramedullary Nailing: a comprehensive review (book)
- Reviewer of Archives of Orthopaedic and Trauma Surgery (Journal)
- European Journal of Trauma and Emergency Surgery and other journals
- Author of more than 100 publications in international journals.
Mez Acharya

I completed my general orthopaedic and subspecialty training in orthopaedic surgery and have been working in the capacity of Consultant in orthopaedic surgery at North Bristol NHS Trust for over 5 years.

My subspecialty interests include pelvic and acetabular / complex trauma and primary hip and knee arthroplasty and complex revision hip surgery. During my time in post as consultant I have been one of three pelvic surgeons taking local and tertiary referrals for pelvic and acetabular trauma in the South West of England. I have worked independently and with the team to assess and treat patients with these complex injuries.

I am involved with the increase volume of complex orthoplastic cases to ensure that these cases are managed effectively and in a cohesive manner. I am one of the only revision hip surgeons that manages complex reconstruction procedures dealing with pelvic discontinuity.

I have independent responsibility in the assessment and surgical treatment of patients with routine hip and knee arthritis but also carry out numerous more complex cases and revision hip arthroplasty. I have set up and chaired the Bristol Bath revision hip meeting and have played an active role in the annual Bristol Hip Arthroplasty Course.

I am the Directorate lead for VTE and have also recently taken up the role of deputy surgical skills lead for the Severn deanery. I represent the Orthopaedic Trauma Society at the BOA quality outcome committee and am the lead for trauma registries.

Recent Publications:
Acharya M. Severe pelvic trauma in the UK: The trainees experience , needs and expectations. Journal of Trauma and Orthopaedics. 2015 Dec; 3(4) 52-54
Bamford R, Acharya M. Putting the boot in Intensive simulation based training to prepare surgical trainees for practice. Journal of Trauma and Orthopaedics. 2015 Dec; 3(4) 48-51

Michael Wich – Germany

Prof. Michael Wich has completed his medical training at the University of Frankfurt in Germany 1984. After his residency in various German clinics he worked since 1994 as a consultant in the field of trauma and orthopedic surgery. In 2001 he became the clinical director of one of the biggest trauma centers in Germany at the "Unfallkrankenhaus Berlin".

His expertise covers especially pelvic and acetabular reconstruction after injuries. He holds multiple patents in the field of trauma implant developments. He looks at a long history of medical lectures throughout the world and was invited guest speaker within the last 2 years in the US, China, South Korea, Japan and Saudi Arabia.
Paul Heini – Switzerland

Education/Training
1988 Graduation Medical School, University of Berne, Berne Switzerland
1995 Board certificate for Orthopaedic Surgery
2008 Associate Professor University of Bern
2012 Titular professor University of Bern

Professional and research activities
10/2009 Head Spine Service Sonnenhof Hospital, Bern, Switzerland
1996-2009 Head of the Spine Service Department for Orthopedic Surgery of the University of Bern.
2005-2009 Deputy chairman department for Orthopedic Surgery of the University of Bern.

Surgical activities
More than 1500 surgical orthopaedic interventions, mainly in trauma cases

Over 7000 Spine interventions of any kind except spinal cord pathologies
Swiss Association of Physicians (FMH)
Swiss Society of Orthopaedic Surgery
Swiss Spine Society
European Spine Society
AO Spine

Review activities
Editorial Board European Spine Journal
Editorial Board Archives of Orthopaedics and Trauma Surgery
Editorial Board Global Spine Journal
Regular reviews for several journals

Peter Giannoudis – UK

- Professor - Chairman (School of Medicine, University of Leeds)
- Honorary Consultant, at LGI (2500 bed teaching hospital, serving a population in the region of 3.5 million)
- Section Head Trauma & Orthopaedic Surgery, School of Medicine University of Leeds
- Management of multiple injured patients, including pelvis and acetabulum, spinal fractures, open fractures, long bone fractures, fractures of the tibial plateau, distal tibia and hindfoot.
- Reconstructive surgery (non-unions, malunions, infections, and in general post traumatic complications).

- Chair OTA, International Membership Committee (2014-2019)
- Executive member Trauma Committee EFORT (2010 onwards)
- Board Trustee British Trauma Society (2010 onwards)
- Secretary ESTROT (European Society of Tissue Regeneration in Trauma & Orthopaedics)
- Founder and Chairman Day One Trauma Charity

Over 600 publications of manuscripts in peer review journals.
Over 80 chapters in medical textbooks.
Pietro Regazzoni – Switzerland

1962-1969: medical studies: University of Basle
1969: Swiss and US (ECFMG) final exam

Surgical Curriculum:
1970-1974: Surgical training - Surgical Department University of Basle (Prof. M. Allgöwer)
1975: board certification surgery (FMH)
1978: Laboratory for Experimental Surgery, Davos (Prof. S.M. Perren)
1984: assistant professor University of Basle
1985-2008: Head of trauma surgery University Hospital Basle, Switzerland
1992: Professor of Surgery, University of Basle

Other functions:
- honorary trustee AO Foundation
- honorary member of Swiss society of Surgery
- honorary member of Swiss Society of Traumatology

Rodrigo Pesantez – Columbia

Medical School: Colegio Mayor de Nuestra Señora del Rosario Facultad de Medicina Bogotá – Colombia January 1983 - November 1987

Internship: Hospitales de Kennedy y San José Bogotá - Colombia December 1987 - December 1988

Residency: Colegio Mayor de Nuestra Señora del Rosario Ortopedia y Traumatología January 1990 - January 1994

Chief of Orthopaedic Trauma - Departamento de Ortopedia. Fundación Santa Fe de Bogotá. November 2002 - present.

Member of the Hip and Joint Reconstruction Service - Departamento de Ortopedia. Fundación Santa Fe de Bogotá. November 2002 - present.
I completed my higher surgical training in Trauma & Orthopaedics on Bristol Rotation. During this time I developed an interest in upper limb surgery, specifically elbow, wrist and hand surgery. I underwent sub-speciality training in Nottingham (interface hand fellowship) and Sheffield (revision elbow shoulder and elbow surgery and sports surgery). I have been appointed as a consultant upper limb surgeon in Bristol Royal Infirmary. My practice comprises of both secondary and tertiary elective and trauma referrals. These include rheumatoid surgery, osteoarthritis surgery, joint replacement, complex fracture management, arthroscopy and sports surgery. I have a special interest in research, have published more than 45 peer-reviewed articles and I have authored a number of key chapters in orthopaedic textbooks. Orthopaedic surgery, Osteoarthritis, Sports injury, Wrist surgery, Upper limb surgery, Hand surgery, Elbow surgery
All aspects of hand, wrist and elbow surgery. Sports injury & arthroscopy

Professional memberships:
Fellow of Royal College of Surgeons (Intercollegiate).
British Elbow and Shoulder Society.
British Society for Surgery of the Hand.
British Orthopaedic Association

Current NHS posts:
Consultant Hand and Elbow Surgeon, Bristol Royal Infirmary (Trauma), University Hospitals Bristol NHS Foundation Trust.
Consultant Hand and Elbow Surgeon, Southmead Hospital (Elective), North Bristol NHS Trust.

Stephaan Nijs – Belgium

PhD in the Biomedical sciences (PhD), KU Leuven (2010)
Postgraduate Hospital Policy and Management, cum laude, KU Leuven (2003)
Specialist in general surgery, KU Leuven (2000)
Doctor of Medicine, Surgery and Obstetrics, magna cum laude, KU Leuven (1994)
Koninklijke Kadetschool Laken (Royal Cadet School) (1984-1987)

Clinical:
Chairman department of Traumatology (2013-present)
Coordinator Care program Polytrauma (2009-present)
Coordinator Care program General Traumatology (2012-present)
Adj. Clinical head Traumatology, UZ Leuven (08/2003 – present)
Member Board of Surgery UZ Leuven (2013-present)
Member Board of the Emergency Department UZ Leuven (2015-present)
Member Board of the Care program committee UZ Leuven (2015-present)

Teaching:
Part-time associate professor KU Leuven (2014-present)
Part-time assistant professor KU Leuven (2010-present)
Part-time lecturer Katholieke Hogeschool Leuven (2001-present)
Coordinator Traumatology Programme for Surgery and Orthopaedics Residents, UZ Leuven (Advanced Master) (2010-present)
Coordinator “Traumatology” part of the Flemish Inter-University postgraduate for Surgery Residents
Instructor for several international organisations / postgraduate courses
Regional Speakers

Alaa Zoheiry – Egypt

- Changes in C - reactive protein and Erythrocyte sedimentation rate after Hip fractures. Zagazig medical journal 2013
- Suture anchor Latissmus Dorsi transfer to improve the external rotation of the shoulder in Erb’s palsy. Kasr al Aini medical journal 2014.
- External rotation osteotomy of Proximal Humerus for the management of residual Brachial plexus birth injury (Improvement of the shape improves the function). Suez Canal medical journal 2015.
- The role of core decompression in management of bone marrow edema syndrome of the hip. Suez Canal university journal 2015.

Hatem Galal Said - Egypt

Dr Said is currently a Professor in Assiut University, Egypt, who was awarded the State Encouragement Prize for Medical Sciences in 2012.

His medical training and most of the post gradutate training was in Assiut University Hospital. He went to the UK to finish his M.D. thesis on Infected TKR, in 2001-2002. In 2005, he revisited the UK as a Senior Arthroscopy fellow in Birmingham Royal Orthopedic Hospital, where he trained on Shoulder Arthroscopy. His fellowship on Hip Arthroscopy was in Germany in 2010. Recently, with the increasing flow and recognition of FAI, Hip arthroscopy has taken a decent share in his practice and he has become one of the leaders in the field in the Middle East. He has taught on numerous international meetings and courses in the field of Hip & Shoulder Arthroscopy.

He chaired many Courses the last is the 2nd Assiut Shoulder Arthroscopy course in Nov. 2015, which included the first Cadaveric arthroscopy training in Egypt. In 2015, he became the Editor in Chief of the SICOT-J Journal and has been on the Editorial board of AJSM and International Orthopaedics Journals since 2008.

As an active member of AOTrauma Middle East, he is honored to be a member of the educational committee for ME, and was chairman of the Regional Advances courses for 2013 and the Master Shoulder and Elbow course in 2015. Being a member of the Regional Educational Team (RET), and an international faculty on the AO courses, allows him to share his passion for teaching.
Khaled Hussein – Lebanon

Medical study: Université Libre De Bruxelles. Belgium.
Diploma of Orthopedic surgery: Université Libre de Bruxelles, Belgium.

Graduates (Belgium):
1988: Graduated as General Physician – Free University of Brussels.
1994: Graduated as orthopedic and trauma surgeon – Free University of Brussels.
1994: Graduate of hand surgery and microsurgery – Catholic University of Leuven-Belgium.

At this time Position:
1. Head of orthopedic and trauma department at Nini Hospital, Tripoli – Lebanon.
2. Head of orthopedic and trauma department at Abyad Medical center, Tripoli – Lebanon.
3. Head of osteoporosis department at Abyad Medical center, Tripoli – Lebanon.
4. Associate Professor at Lebanese University for Orthopedic surgery.
5. Chairperson AO trauma Lebanon Chapter; Mandate 2015-2018.

Societies Member:
Member of S.I.C.O.T.
Member of the Orthopedic Belgian Society.
Member of the Orthopedic Lebanese Society.
Membre of AO Spine.
Member AO trauma.
Mahmoud Abdel Karim – Egypt

- Bachelor of Medicine and Surgery (M.B.B.CH.): 1997
  Assigned Excellent with honours. Faculty of Medicine, Cairo University, Egypt
- Master of Science (M.Sc.) in Orthopaedic & Trauma Surgery: 2002
  Assigned Excellent, 1st on the class. Faculty of Medicine, Cairo University, Egypt
- Medical Doctorate (M.D); passed the exam on November 2005
  Faculty of Medicine, Cairo University, Egypt.

CURRENT POSTS:
- Associate Professor of Trauma & Orthopaedics; Cairo University Hospitals.
- Locum Consultant, NHS hospitals, United Kingdom
- Consultant Orth, Arthroplasty & Pelvic trauma; As Salam Int’l hospital
- Consultant Orth, Arthroplasty & Pelvic trauma; Dar Al Fouad hospital
- Consultant Orth, Arthroplasty & Pelvic trauma; Air Force hospital
- Consultant Orth, Arthroplasty & Pelvic trauma; Nile Badrawy hospital
- Consultant Orth, Arthroplasty & Pelvic trauma; Nasser Institute.
- Consultant Orth, Arthroplasty & Pelvic trauma; Al-Helal hospital

Mahmoud M Odat – Jordan

Senior Consultant Orthopaedic & Trauma Surgeon
Chairman of Education AO Trauma Middle East & Africa
Overall Chair, of the Regional AO Trauma Principle Courses since 2010
Chair, COT ACS-Jordan Chapter
Chair, ATLS Jordan Chapter
Member, Global AO Trauma Education Commission
Member, Global ORP (Operative Room Personnel) ETF (Educational Task Force)
Member, RETT (Regional Education Training Team)

Previous Posts

Member Of AO RET Team from 2012-present

Rima Nasser – Lebanon

Dr Nasser is an American board certified orthopaedic surgeon who graduated from Duke University Medical School and did her orthopaedic training at the University of Illinois in Chicago.

She has completed two fellowships, one in adult reconstruction (hip and knee replacement) and one in hip arthroscopy.

She was in practice for several years in the US before she returned to Lebanon and is currently an assistant professor at LAU school of medicine, director of the orthopaedic residency program there, and she is affiliated with Rizk hospital (UMCRH), and Clemenceau Medical Center.
**Sami Roukoz – Lebanon**

Assistant Professor in orthopedics at Saint Joseph University in Beirut and Head of the Orthopedic Department in Hotel Dieu de France University hospital.

Orthopedic Surgeon with main interest in upperlimb surgery, shoulder arthroscopy and reconstruction, trauma, microsurgery, longbone reconstruction and post traumatic bone infection.

Graduated from Saint Joseph University in Beirut, had a fellowship in Saint Antoine University Hospital in Paris and Bichat University Hospital in Paris

I have many publications in international journals (rotator cuff, bone reconstruction, flaps, basic science)

Member of many international orthopedic societies and had many lectures in international conferences and orthopedic courses mainly on shoulder, trauma and basics.

**Waleed Abdulwahid – Iraq**

- Head of Joint replacement center, Special Nursing Home Hospital, Medical City Teaching Complex (MCTC), Baghdad, Iraq
- Consultant Orthopedic Surgeon, Special Nursing Home Hospital & Gazi Al-Hariri Special Surgery Hospital, MCTC, Baghdad, Iraq
- Training program director “Fellowship of hip & knee reconstructive surgery”
- Training program director of Arabic Board Orthopedic Postgraduate study, Iraq.
- Examiner of Arab Board Postgraduate study
- Faculty, Iraqi board orthopedic postgraduate study
- Faculty, Arab board emergency medicine postgraduate study, Iraq
- Moderator of consultative committee of orthopedic surgery, MOH, Baghdad, Iraq
- AOTrauma, Iraq, Country Council Chairperson, since Feb 2014.
Amr Shawarby

Professor of Neurosurgery
Current Positions:
Medical Director of Neuroscience in SEHA Abu Dhabi
Chairman of Neurosurgery in Tawam Hospital
President of Pan Neuro Society

Past President of the Emirates Neuro Society
Nominated as the second Vice President for the World Federation of the Neurosurgical Society (WFNS)

Ehab Aldlyami

Consultant Hand and Orthopaedic surgeon
The Pulvertaft Hand Centre,
Royal Derby Hospital NHS trust
Derby, UK

Since 2013 I have been working as a Consultant Hand and Orthopaedic Surgeon. At present I am involved in a 1-in-8 trauma on call rota. My weekly clinical commitment is three clinics and four operating sessions. My practice include acute hand and upper limb trauma, post-traumatic hand and wrist reconstruction, flexor tendon reconstructive surgery, scaphoid surgery, vascularised bone grafting, chronic wrist pain, carpal instability surgery, arthroscopic wrist, and Dupuytren Surgery.
Girges Latif

Banha College Of Medicine - Zagazig University
Banha Specialty Diploma In Orthopedic Surgery – Egypt 1993
Senior Specialist in Trauma Surgery – Rashid Hospital – Dubai UAE

Hamed Badawi

Imad Hashim Ahmad received his M.B.Ch.B from Mosul Medical College in Iraq in 1977 and passed his primary F.R.C.S. examination in 1979, final F.R.C.S. examination in 1982 from the Royal College of Surgeons of Edinburgh. He got his F.R.C.S. in Neurosurgery in 1986 at the Royal College of Surgeons in Edinburgh. He’s currently a Consultant Neurosurgeon and spine surgeon at the Medical International Specialist Centre and is the visiting surgeon of the Mediclinic City Hospital and the Canadian Specialist Hospital. He is an assistant professor of neurosurgery at Dubai Medical College. He was the president of the Emirates Neuroscience Society. He is currently an education advisor for the AO Spine Middle East. He is a reviewing editor of the Pan Arab journal of Neurosurgery.
Dr Saeed Al Althani received his MBBS from the College of Medicine and Medical Science, at Dammam University (King Faisal University) in Saudi Arabia, in 1993 before an Orthopedic Residency program at the University of Toronto, Canada. He completed fellowships in Hand, Sport and Arthroscopy in Toronto.

Dr. Althani is the President of the Emirates Orthopedic Society, Chairperson of AOTRAUMA, UAE Chapter, and a member of the Arab Board Orthopedic Examination Committee. He specializes in the treatment of arthritis in both old and young, active patients.

He lectures nationally and internationally, and through his basic science and clinical research has mastered several innovative techniques for the treatment of shoulder, elbow and knee conditions.

Usama Saleh

Education:
MD, Faculty of Medicine, Zagazig University, Zagazig / Egypt. 2002
Master Degree of Orthopedic Surgery, Ain-Shams University, Egypt. 2007
Membership of Royal College of surgeon of England, MRCS (London) 2009
Egyptian Board of orthopedics 2010
PhD Degree in Orthopedic Surgery, Cairo University, Egypt 2015

Current Position:
Orthopedic and Trauma Surgeon, Medcare Orthopedic and Spine Hospital, Dubai

Yaqoub Al Hammadi

Deputy Chief Medical Officer / Chief of Orthopedics Department at Sheikh Khalifa Medical City (Managed by Cleveland Clinic) – United Arab Emirates

Education – the University of Glasgow, University College London
As “Leader in Healthcare Specialty Markets” in the MENA region, Amico engages in sales, marketing, service engineering and integrated professional support solutions for advanced medical devices. The company specializes in various clinical therapies and products. The Orthopedic field has been one of the core foundations for Amico’s success since its inception, wherein the company specializes in all fields of supplies offering a wide variety of comprehensive orthopedic solutions and surgical equipment ranging from ultra-high definition imaging systems to tissue regeneration products covering Arthroscopy, Arthroplasty, Spine and Neuro. Therapies.

The company employs 1,000+ people with direct operations in 15 countries in the MENA region. Amico was founded by Akef El Maghraby M.D. & Mihran Hazarian in 1984 and is headquartered in Dubai United Arab Emirates.

Founded in 1927 and headquartered in Warsaw, Indiana, USA, Zimmer Biomet is a global leader in musculoskeletal healthcare. We design, manufacture and market orthopaedic reconstructive products; sports medicine, biologics, extremities and trauma products; spine, bone healing, craniomaxillofacial and thoracic products; dental implants; and related surgical products.

We collaborate with healthcare professionals around the globe to advance the pace of innovation. Our products and solutions help treat patients suffering from disorders of, or injuries to, bones, joints or supporting soft tissues.

We have operations in more than 25 countries around the world and sell products in more than 100 countries.
You don't just repair wrists, you help restore movement

The fine-tuned DVR® Crosslock Distal Radius Plating System

Stable fixation is critical. That's why we have engineered the DVR Crosslock with an anatomic design, enhanced fixation options over the existing DVR Anatomic and streamlined instrumentation. With these features and over 10 years of clinical heritage, the DVR Crosslock system continues to refine fracture fixation.

Anatomic Design  Enhanced Fixation Options Over DVR Anatomic  Streamlined Instrumentation

Naghi Medical is a leading provider of medical devices in the United Arab Emirates (UAE). With offices in Abu Dhabi and Dubai, Naghi Medical supplies hospitals, universities and various types of medical facilities across the UAE with the highest quality products and leading technologies. Operating under the umbrella of Gulf Medical Company, with headquarters in the Kingdom of Saudi Arabia and dedicated since 1983 to offering specialized solutions to the medical sector, Naghi Medical is a professional exemplification of building long-term partnerships with suppliers and customers in the UAE’s medical field.
Lilly is a global healthcare leader that unites caring with discovery to make life better for people around the world. We were founded more than a century ago by a man committed to creating high quality medicines that meet real needs, and today we remain true to that mission in all our work. Across the globe, Lilly employees work to discover and bring life-changing medicines to those who need them, improve the understanding and management of disease, and give back to communities through philanthropy and volunteerism.
WHEN PATIENT IS IN SURGERY WITH AN OSTEOPOROTIC FRACTURE
HELP TREAT THE UNDERLYING CONDITION

CONSIDER TERIPARATIDE, THE ONLY FDA-APPROVED BONE ANABOLIC AGENT FOR OSTEOPOROSIS TREATMENT

BEFORE FORTÉO®
SAME PATIENT 21 MONTH AFTER FORTÉO®

TERIPARATIDE is indicated for:
1- Treatment of postmenopausal women with osteoporosis at high risk for fracture.
2- Increase of bone mass in men with primary or hypogonadal osteoporosis at high risk for fracture
3- Treatment of men and women with osteoporosis associated with sustained systemic glucocorticoid therapy at high risk for fracture.

Solution for injection in pre-filled pen, Teriparatide
1. NAME OF THE MEDICINAL PRODUCT FORTÉO 20 micrograms/80 microliters solution for injection in pre-filled pen, 2. QUALITATIVE AND QUANTITATIVE COMPOSITION Each dose contains 20 micrograms of teriparatide. One pre-filled pen of 2.4 ml contains 600 micrograms of teriparatide (corresponding to 250 micrograms per mL). Teriparatide, nhPTH(1-34), produced in E. coli, using recombinant DNA technology, is identical to the N-terminal amino acid sequence of endogenous human parathyroid hormone. 3. PHARMACEUTICAL FORM Solution for injection in a pre-filled pen. Colourless, clear solution. 4. CLINICAL PARTICULARS 4.1 Therapeutic indications, Treatment of osteoporosis in postmenopausal women and in men at increased risk of fracture. In postmenopausal women, a significant reduction in the incidence of vertebral and non-vertebral fractures but not hip fractures has been demonstrated. Treatment of osteoporosis associated with sustained systemic glucocorticoid therapy in women and men at increased risk of fracture. 4.2 Pharmacology and method of administration. The recommended dose of FORTÉO is 20 micrograms administered once daily by subcutaneous injection in the thigh or abdomen. Patients must be trained to use the proper injection technique. A User Manual is also available to instruct patients on the correct use of the pen. The maximum total duration of treatment with FORTÉO should be 24 months. The 24-month course of FORTÉO should not be repeated over a patient’s lifetime. Patients should receive supplemental Calcium and vitamin D supplements if dietary intake is inadequate. Following cessation of FORTÉO therapy, patients may be continued on other osteoporosis therapies. FORTÉO should not be used in patients with severe renal impairment. No data are available in patients with impaired hepatic function. 4.3 Contraindications • Hypersensitivity to the active substance or to any of the excipients. • Pregnancy and lactation • Pre-existing hypercalcemia • Severe renal impairment • Metabolic bone diseases other than primary osteoporosis (including hyperparathyroidism and Pagel’s disease of the bone) • Unexplained elevations of alkaline phosphatase • Prior external beam or implant radiation therapy to the skeleton. • Patients with skeletal malignancies or bone metastases should be excluded from treatment with teriparatide. 4.4 Special warnings and precautions for use In normocalcemic patients, slight and transient elevations of serum calcium concentrations have been observed following teriparatide injection. Serum calcium concentrations reach a maximum between 4 and 6 hours and return to baseline by 16 to 24 hours after each dose of teriparatide. Routine calcium monitoring during therapy is not required. Therefore if any blood samples are taken from a patient, this should be done at least 16 hours after the most recent FORTÉO injection. FORTÉO may cause small increases in urinary calcium excretion, but the incidence of hypercalciuria did not differ from that in the placebo-treated patients in clinical trials. FORTÉO has not been studied in patients with active urolithiasis. FORTÉO should be used with caution in patients with active or recent urolithiasis because of the potential to exacerbate this condition. In short-term clinical studies with FORTÉO, isolated episodes of transient orthostatic hypotension were observed. Typically, an event began within 4 hours of dosing and spontaneously resolved within a few minutes to a few hours. When transient orthostatic hypotension occurred, it happened within the first several doses, was relieved by placing subjects in a reclining position, and did not preclude continued treatment. 4.8 Undesirable effects The most commonly reported adverse reactions in patients treated with FORTÉO are nausea, pain in limb, cramps, vertigo, headache, scoliosis, diziness, palpitations, anemia, dyspepsia, increased sweating, hypertension, hypercholesterolemia, fatigue, chest pain, depression. 5. PHARMACEUTICAL PARTICULARS, Shelf life 2 years. Chemical, physical and microbiological in-use stability has been demonstrated for 28 days at 2-8°C. Once opened, the product may be stored for a maximum of 28 days at 2°C to 8°C. Other in-use storage times and conditions are the responsibility of the user. Special precautions for storage: Store in a refrigerator [2°C – 8°C] at all times. The pen should be returned to the refrigerator immediately after use. Do not freeze. Do not store the injection device with the needle attached.

Lilly
Stryker is one of the world’s leading medical technology companies and, together with our customers, we are driven to make healthcare better. The Company offers a diverse array of innovative products and services in: Reconstructive / Endoscopy / Integration & Connectivity / Medical / Power Tools / Surgical Equipment / Navigation / Reconstructive / Neurotechnology & Spine. Stryker is active in over 100 countries around the world.
Gamma
When history meets technology, ...

Launch of Gamma: Stryker introduced the Gamma nail, the very first implant of its kind. A result of inspiration combined with many years of evolutionary innovation.

Launch of Gamma 3:
Based on 15 years of experience and more than 700,000 Gamma nails sold worldwide. An enhanced implant with corresponding instruments for a more minimally invasive surgery.

Over 3 million Gamma nails sold worldwide: The first system of its kind over 26 years ago and still the most preferred.

www.stryker.com
Smith & Nephew supports healthcare professionals in more than 100 countries in their daily efforts to improve the lives of their patients.

We do this by taking a pioneering approach to the design of our advanced medical products and services, by securing wider access to our diverse technologies for more customers globally, and by enabling better outcomes for patients and healthcare systems.

We have leadership positions in:

- **Orthopaedics Reconstruction** - joint replacement systems for knees, hips and shoulders
- **Advanced Wound Management** - wound care treatment and prevention products used to treat hard-to-heal wounds
- **Sports Medicine** - minimally invasive surgery of the joint
- **Trauma & Extremities** - products that help repair broken bones

We have around 15,000 employees around the world.
Mantenimento della compressione ed eliminazione dell'effetto Z
Le viti integrate avvitandosi diventano solidali e generano forze di spinta/trazione che mantengono la compressione dopo la rimozione degli strumenti in modo da eliminare l'effetto Z.

Stabilità rotazionale intertrocanterica
La forma trapezoidale consente di ottenere un pressfit nella regione metafisaria e posiziona più materiale sulla parte laterale del chiodo in cui le forze di resistenza alla trazione e di tensionamento tendono a essere maggiori.

Controllo della rotazione durante la riduzione
Un meccanismo a cremagliera converte la rotazione in compressione lineare attiva, stabilizzando al contempo il frammento mediale.

Eliminazione della migrazione mediale
La testa della vite di compressione spinge medialmente contro il chiodo e scarica le forze di tensione dalla parete laterale.

Prevenzione delle fratture periprotesiche
La punta distale diapason è meno rigida per ridurre l'aumento delle sollecitazioni e l'incidenza di dolore nella parte anteriore della coscia.
Regen Lab is a global leader in products for autologous regenerative medicine based on freshly prepared platelet rich plasma (platelet concentrate) from the patient’s own blood, used either alone or combination with hyaluronic acid or other fresh autologous cells from the patient’s fat or bone marrow.

These freshly prepared concentrates are safer and have longer lasting effects than traditional cell-therapy products, they accelerate healing and have proven efficacy in ageing management, wound care and musculoskeletal pathologies.
