Intrapelvic Acetabular Plate Launch

Pelvic and acetabular fracture management

Program overview

The course offers the opportunity to acquire basic theoretical and advanced practical knowledge of the diagnosis, classification, decision-making and treatment of acetabular fractures. Focusing on practical exercises with synthetic bone in the dry lab, the participants will have the opportunity to train on advanced pelvic osteosynthesis.

Program agenda

- 12:00 Acetabular fractures classification, indication and treatment
- 12:40 AIP Anterior intrapelvic approach demonstration and instrumentation
- 13:00 Dry lab workshop : Intrapelvic Acetabular Plate (IAP) practical workshop on Synthetic bone model with soft tissues simulation
- 14:00 Questions & Closing

Invited Faculty

Dr. Omar Sabri

A. Professor, Consultant
Surgeon in Trauma &
Orthopaedics

David Müller
